

Harivignesh G

Backend-focused Full Stack .NET Developer

Salem, India — 9629172007 — gopiharivignesh@gmail.com — DoB: 24th Oct 2002

Professional Summary

Software Engineer with 1+ year of experience building and maintaining production-grade ERP and inventory systems using ASP.NET Core, Web API, and MS SQL Server. Experienced in designing RESTful APIs, implementing JWT-based authentication and RBAC, optimizing complex stored procedures, and migrating legacy PHP systems to scalable .NET solutions. Improved operational efficiency by up to 70% through automation and centralized architecture.

Technical Skills

Backend: C#, ASP.NET Core, ASP.NET Web API, Razor Pages, Entity Framework Core, LINQ, ADO.NET

Security: JWT Authentication, Role-Based Access Control (RBAC), Claims-based Authorization

Architecture: Clean Architecture, Repository Pattern, Dependency Injection, Layered Architecture,

Database: Microsoft SQL Server, Complex Stored Procedures, Query Optimization, Indexing, Transactions

Frontend: HTML5, CSS3, Bootstrap 5, jQuery, javascript, AJAX, JSON, DataTables (Server-side Processing)

Development Tools: Visual Studio 2022, SQL Server Management Studio (SSMS),

API Testing: Postman, Swagger (OpenAPI)

Version Control: Git, GitHub, TFS (Azure DevOps)

Project Management: Redmine (Agile / Scrum)

Professional Experience

Junior Software Engineer

Nov 2024 – Dec 2025

SV Aurora Innovations Pvt Ltd, Salem, India

- Engineered 40+ RESTful APIs in a live ERP manufacturing system supporting 50+ daily users.
- Implemented JWT authentication and RBAC for secure module-level access control.
- Improved performance by shifting heavy business logic to SQL stored procedures
- Delivered 15+ production releases including feature enhancements, validations, and bug fixes.
- Contributed to migration of legacy PHP-based HSRP portal to ASP.NET Core including database redesign and deployment.
- Provided production support, resolved UAT issues, and collaborated with stakeholders for requirement analysis.

Projects

SV Aurora – ERP & HSRP Production System

- Designed and developed a production-grade ERP system supporting the complete HSRP manufacturing lifecycle from Purchase Orders to Dispatch.
- Implemented Inventory, Production, Inspection, and Dispatch modules replacing Excel-based workflows and improving traceability.
- Engineered complex production logic including hydraulic pressure tracking, hologram processing, and laser number marking validation.
- Designed stored procedures and optimized indexing for handling real-time manufacturing transactions.
- Generated operational and analytical reports using Crystal Reports for production monitoring.

CloudHiTech – Inventory & Project Costing System

- Developed PO, MRN, Project Tracking, DPR Entry, and Project Costing modules to streamline procurement workflows.
- Implemented multi-site inventory monitoring and stock reconciliation mechanisms.
- Designed project costing algorithms to calculate real-time material usage and budget consumption.
- Optimized SQL queries and stored procedures reducing reconciliation effort by 50%.
- Integrated server-side DataTables for efficient handling of large transactional datasets.

Education

B.Tech – Information Technology

2020 – 2024

Mahendra Engineering College, Salem

CGPA: 8.71 / 10
